

Ponder This

What issues, organizations, or communities are important to me?

When I am energized and focused, what am I working on?

What do I really care about? What sparks my interest?

What do I feel compelled to pursue?

What problems would I like to be a part of solving (big or small)?

How do I want to help?

Which of the following do I most prefer?

- Working with people (teaching, counseling, community organizing, etc.)
- Working with ideas (writing, research, mathematics, etc.)
- Working with things (computers, mechanics, repairing things, etc.)
